#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Priority***

1. This application appears to be a division of Application No. 10/202,554, filed July 23, 2002. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." The divisional application should set forth only that portion of the earlier disclosure which is germane to the invention as claimed in the divisional application.

***Claim Objections***

2. Claims 34-38 are objected to because of the following informalities: claims 34-38 depend on claim 0, which does not exist. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 33-35 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Lackey (USPN 4,949,846).

In reference to claims 33-35 and 37, Lackey discloses a ski comprising: an edge extending longitudinally along a first direction and a pair of opposing lateral surfaces extending from the edge; a notch extending at least  $\frac{1}{2}$  inch into the edge; and the edge having a ramp portion that extends at an 9° angle relative to the edge (see diagrams below).

Art Unit: 3721

A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In this case, although Applicant is labeling the ski as a “paper packaging” ski to “support a clip of paper”, this language is not deemed to structural limit the apparatus to such use.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 36 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lackey (USPN 4,949,846).

Regarding claim 36, Lackey discloses an edge with a notch, but does not disclose the notch extending along the entire length of the edge. Lackey also discloses a ramp portion extending from the edge, but fails to specifically cite the angle of the ramp surface relative to the edge. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the length of the notch and the angle of the ramp of Laskey to extend the entire length of the edge and slope at the specific angle of 9°, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimal or workable ranges involves only routine in the art.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
